

# Shortest Path

To get somewhere, you need to go through other places

To get to the beach, you have to drive through some mountains and can't get there

$$1 + (7 - 10) + 3$$

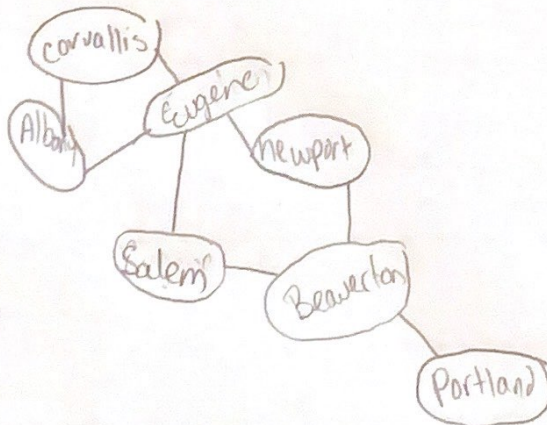

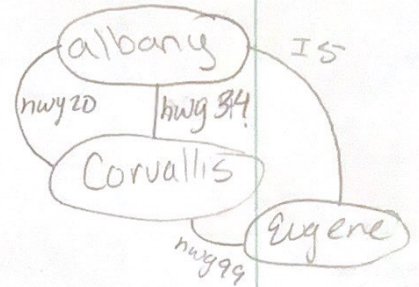

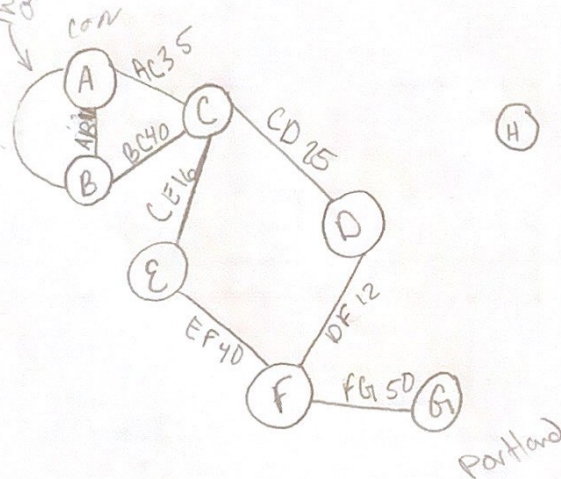

$$-3$$

$$4 + 7 = 11 - 3K$$

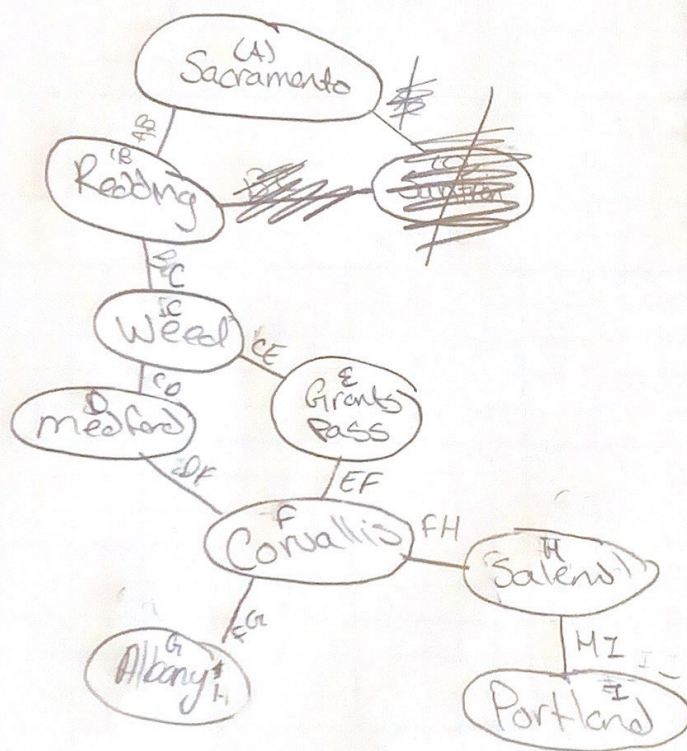

$$1 \rightarrow +2 \rightarrow +5 \rightarrow -10 + 3$$

$$1 + 7 - 10 + 3$$

Thinking like a freeways

DesignRoad TRIP

My family is from Sacramento, CA and these cities are where I tend to stop or notice on my drive from my parents house to Corvallis. I also added Portland, Albany, & Salem because those are 3 cities I travel to often while in Oregon.
